

3. Learning programme

Activity 1: Language lessons	
Learning methods:	Students will attend lessons in French, Spanish and English. During those lessons, they will have to answer questions, to argue and to exchange ideas in foreign languages.
Learning outcomes:	Better knowledge of school systems and everyday life in our countries. Discover some idiomatic sentences, pay attention to the common latin origin of our languages. Improved capacity to interact in a bilingual group.

Activity 2: Orienteering and exploring the city : pay attention to our environment	
Learning methods:	The orienteering will be an opportunity to use knowledge and creativity on the topic of environment: each beacon is a spot for a question or a challenge. Walking in the city will be an opportunity to question the place of women in public space, in toponymy.
Learning outcomes:	Students should be aware that the environment we live in has an effect on our lives: think of how creating a more sustainable environment. Practice the ability of locating in an unknown place.

Activity 3: A biological farm : in reality and in a graphic novel

Cofinanciado por
la Unión Europea

Acuerdo de aprendizaje Erasmus+ - Student Mobility
ID de movilidad: [ID de movilidad asignado en la herramienta de información y gestión de Erasmus+, si está disponible]
Número de proyecto: 2021-1-ES01-KA121-SCH-000019001

Learning methods:	Visit to a farm rules only by women. The farmers have been recently co-writers of a comic book, we will read and understand some extracts of the book, we will rewrite the texts to think about the specific language of graphic novels.
Learning outcomes:	Know more about women in a job where gender stereotypes are strong. Know more about biological agriculture. Writing about stereotypes. Cooperate in respect of all differences.

Activity 4: Recycling paper	
Learning methods:	Newspapers will be used to create new objects
Learning outcomes:	Discover a technique of basketry respectful for the environment.

Activity 5: Cultural visit to a cave	
Learning methods:	Chauvet cave contains some of the oldest known wall paintings. The replica is a work using new technologies to give an idea of the past. The natural site is remarkable and has been place for human activities over centuries.
Learning outcomes:	Know more about European cultural heritage. Know more about the specificities of our region.
